DIRECTORS' REPORT

Corporate Information

The directors submit herewith the financial report of Voltaic Strategic Resources Limited and its subsidiaries (collectively “the Group”) for the half-year ended 30 June 2025.

The Group’s functional and presentation currency is \$AU.

A description of the Group’s operations and its principal activities is included in the review of operations and activities in the directors’ report on page 3.

REVIEW OF OPERATIONS

Voltaic Strategic Resources Limited (ASX:VSR) (“Voltaic”, “VSR” or “the Company”) is pleased to provide its half year report for the period **January to June 2025**.

For the first half of 2025, the Company has focused its exploration efforts on carrying out field work on its Meekatharra and Kooline Projects with rehabilitation carried out at the Ti Tree and Paddys Well projects in the Gascoyne region. The Company made a strategic investment into Geopacific Resources Ltd which owns and operates the Woodlark Island Gold Project in Papua New Guinea. Voltaic remains focused on its strategy of identifying exploration opportunities which offer near term development potential

Figure 1. Voltaic's Minerals Exploration projects in Western Australia

Figure 2. Woodlark Gold Project, Papua New Guinea (Owned and operated by Geopacific Resources Ltd)

Meekatharra Projects

Gold, Base Metals

The Meekatharra Project comprises seven granted Exploration and Prospecting Licences covering a total area of 266 km² within a prolific gold and critical minerals province in Western Australia. This region has historically produced several million ounces of gold and is also emerging as a hub for vanadium development.

Voltaic's Meekatharra tenure is grouped into three distinct project areas:

- Bluebird South
- Bundie Bore
- Cue

The district is steeped in gold mining history. Nannine, located approximately 35 km south of Meekatharra, was the site of the first recorded gold discovery in the Murchison Goldfield (circa 1890), sparking a regional gold rush. The Paddy's Flat "Fenian Mine," established in 1901, was one of the earliest and most significant operations in the area, highlighting the long-standing prospectivity of the district. More recently, substantial mining developments have occurred, including Westgold Resources' flagship Paddy's Flat mine, which has produced in excess of 1.5 million ounces of gold, alongside other nearby operations.

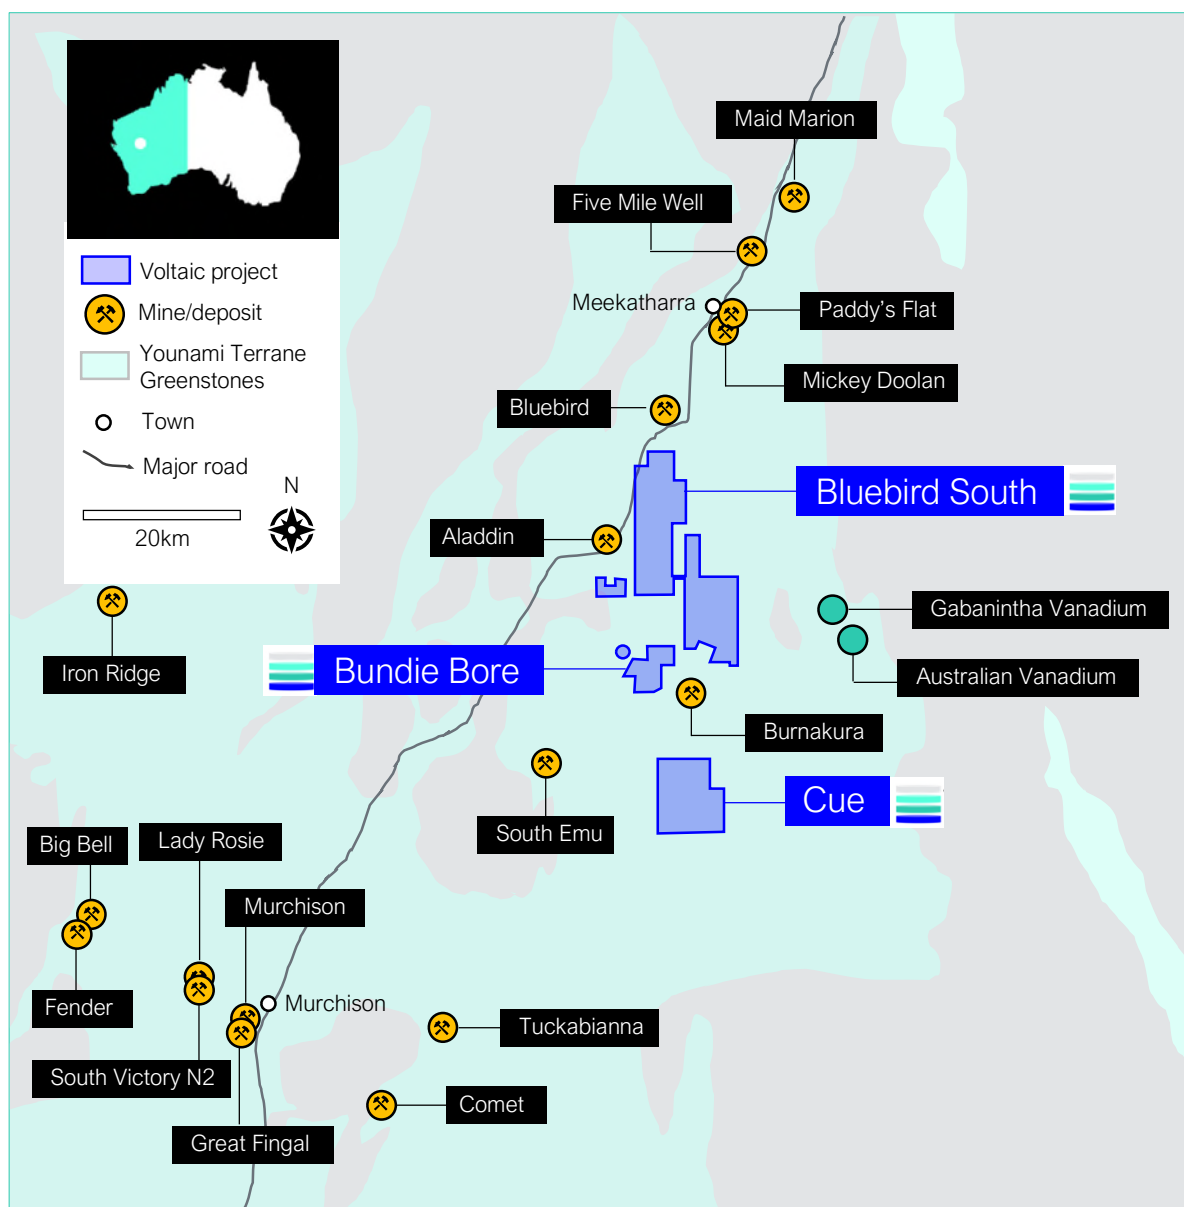

Figure 3. Location of Voltaic's Meekatharra projects, Western Australia

Gold mineralisation in the district is typically hosted within the Gabanintha Formation, the basal sequence of the Murchison greenstone belt, and is controlled by an extensive (>350 km) shear network. Deposit styles include banded iron formation (BIF) hosted sulphide replacement, quartz vein/shear-hosted systems and carbonate stockwork mineralisation.

During the reporting period, Voltaic completed wide-spaced UltraFine+™ (UFF) soil sampling and reconnaissance mapping across licences E51/1909, E51/1946, and E51/2057 to test for gold dispersion along favourable structural trends. This program included 340 infill soil samples (submitted for multi-element analysis with gold as the primary focus) and 10 rock chip samples. The work was designed to identify structural settings typical of the Murchison, where gold mineralisation is often controlled by splays off the Burnakura Shear Zone (BSZ), particularly at intersections with mafic and ultramafic contacts along dolerite units.

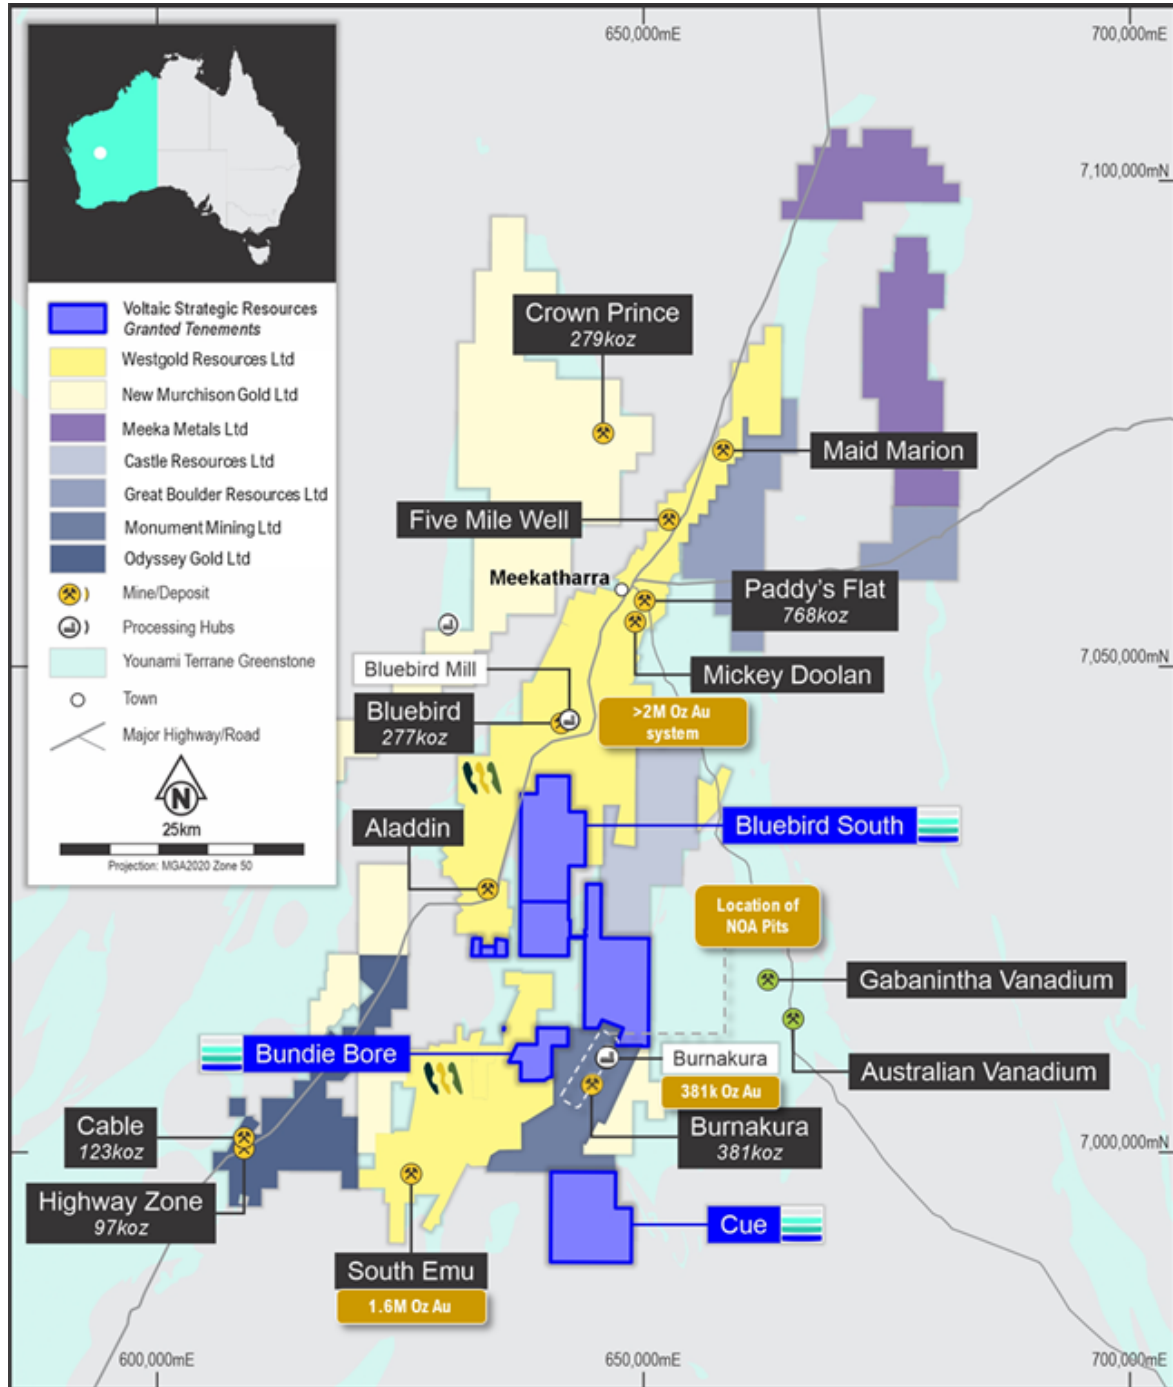

Figure 4. Proximity of Voltaic's Meekatharra projects to other active gold mines and infrastructure

This work has defined two promising, sub-parallel mineralised corridors, “Ark” and “Noa”, which provide a clear framework for the next phase of exploration. Planned follow-up, including targeted Sub-Audio Magnetics (SAM) geophysics, is expected to focus future drill targets and maximise the potential for discovery. With a geological setting and exploration methodology proven by nearby successes such as Great Boulder’s Side Well and Odyssey Gold’s Tuckanarra/Stakewell projects, Voltaic is well-positioned to transition these early-stage targets into potential significant gold discoveries.

Gascoyne and Ashburton Projects

Ti Tree Project - Gascoyne Lithium

The Ti Tree Project is located in Western Australia's Gascoyne Region within the 'Volta Corridor', an 80km interpreted prospective corridor of lithium, caesium, tantalum (LCT)-bearing pegmatites containing Delta Lithium's Yinnietharra lithium discovery. The Corridor is underlain by the Thirty-Three Supersuite, a belt of granitic plutons (intrusions) that have previously been shown to be fertile for LCT mineralisation.

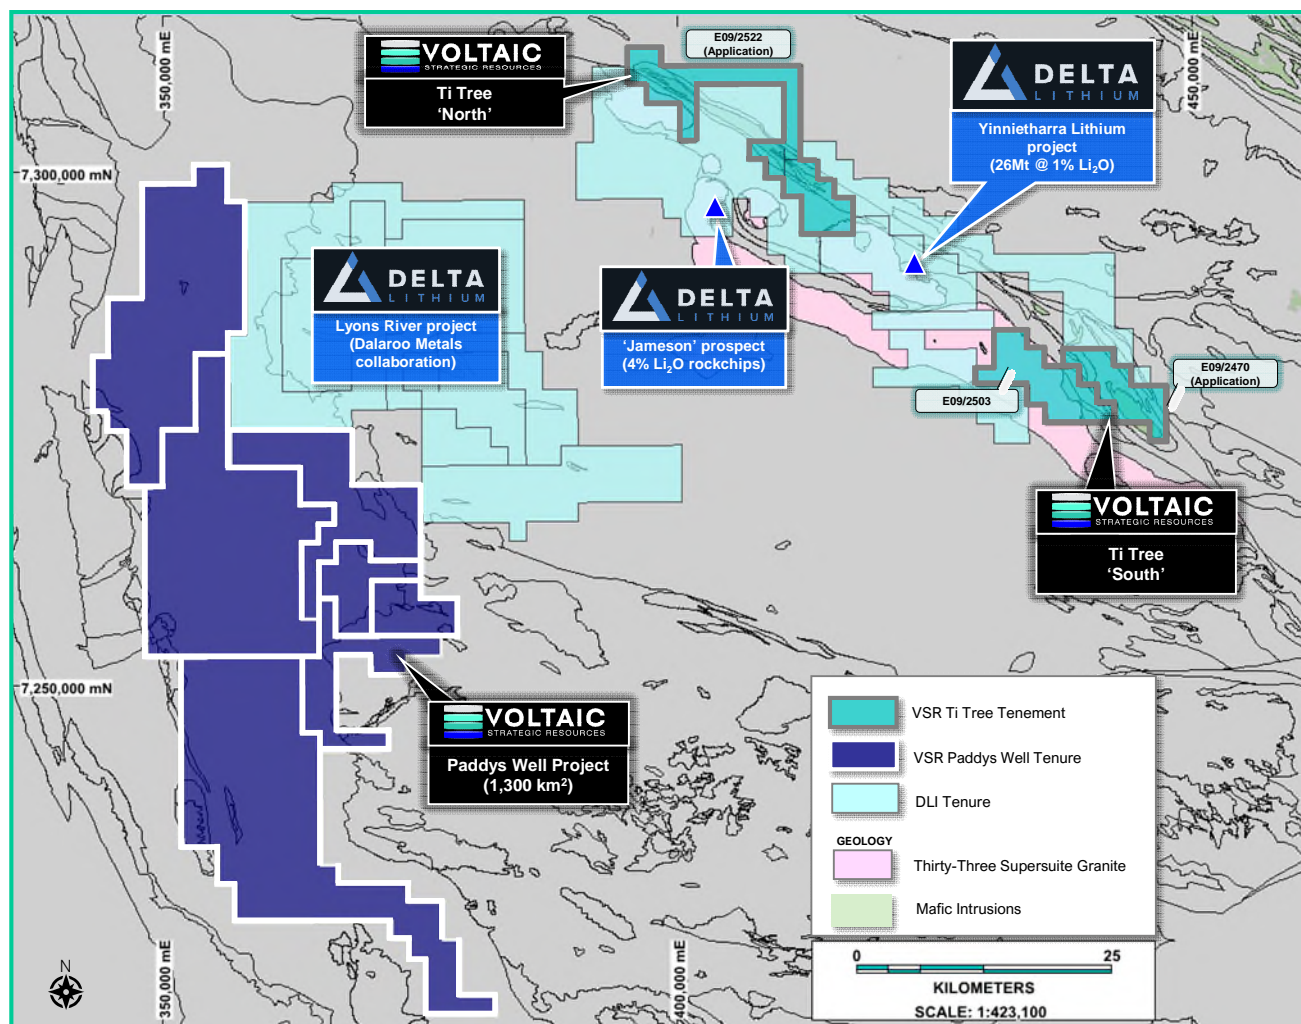

Figure 5. Ti Tree project map. Neighbouring Delta Lithium's Yinnietharra tenure also shown.

In Q1-2024, Voltaic entered into a Farm-in and Joint Venture Agreement ("the Agreement") with Delta Lithium Limited (ASX:DLI), (**Delta**) to expand the exploration of the Company's Ti Tree Lithium Project. Details of this strategic \$12 million Agreement have been provided previously¹ and are summarised below.

- \$1.25 million cash consideration upon commencement of the Agreement.

¹ VSR ASX announcement dated 11th March 2024 - Transformational \$12 million Farm-in and Joint Venture Agreement with Delta Lithium Ltd

- Delta has the right to earn a 51% interest by spending \$3.0 million of exploration expenditure within 24-months, with minimum spend of \$1.0 million (“Stage 1”).
- Delta may earn an additional 29% interest by further expenditure of \$6,250,000 or delivery of a Mineral Resource Estimate (MRE) > 10 Mt @ 0.8% Li₂O within 3-years (“Stage 2”).
- Voltaic to receive a further \$0.5 million payment in cash/script from Delta upon commencement of Stage 2.
- Voltaic to receive a further \$1.0 million payment in cash/script from Delta upon completion of Stage 2.
- On completion of Stage 2, Voltaic can elect to either maintain its 20% by co-contributing; or divest its 20% interest to Delta at fair market value as determined by an independent expert.

Delta has continued with fieldwork activities at its Yinnetharra project, including target generation soil geochemistry and detailed geology mapping to support potential drill testing. Heritage surveys across areas of interest for the upcoming exploration activities are currently being cleared with a view to target generation in the next quarter, following collation and incorporation of these datasets. Delta remains active in the area with the recent acquisition of the Mortimer Hills Lithium-Tantalum Project from Zeus Resources² and its acquisition of the Aston Project from Minerals 260 Ltd³.

Paddys Well Project - Gascoyne **Rare Earth Elements | Lithium | Uranium | Niobium**

The Paddys Well Project covers 1,300km² in Western Australia’s Gascoyne Region within a geological province that has delivered mineral exploration targets across a wide range of metals. The project has both primary carbonatite and clay-hosted REE potential with widespread mineralisation already identified from maiden drilling, and additional prospectivity for Uranium, Lithium and Niobium.

In 2022 and 2023 Voltaic carried out various field surveys and auger drilling at the Paddys Well Project and identified significant shallow clay hosted rare earth element (REE) mineralisation with very encouraging TREO content. However, leach testing identified that the REE’s would not respond to extraction under traditional methods easily. Work was then undertaken to identify potential hard rock carbonatite REE targets using airborne magnetics and radiometrics. This work generated 16 carbonatite targets, 4 of which were ranked as priority 1. These targets can be progressed to drill-ready status once ground truthing and heritage clearances are completed.

The Company also followed up on historical drilling carried out by PNC Exploration and Cameco Australia which identified significant uranium potential, e.g., GAR9630: 9 m @ 930 ppm U₃O₈ incl 1 m @ 4,363 ppm and multiple >1,000 ppm U₃O₈. VSR drillholes at Neo also identified uranium potential (NEORB003: 1 m @ 659 ppm U₃O₈). Radiometrics highlight multiple prospective follow-up targets, with geology and alteration uncannily similar to Jabiluka-style systems.

Although Voltaic has not allocated significant exploration resources to this project, it continues to be a strategic and important part of the Company’s exploration portfolio.

² Delta Lithium Ltd (ASX:DLI) [ASX announcement 28 April 2025](#).

³ Delta Lithium [ASX announcement 21 May 2025](#).

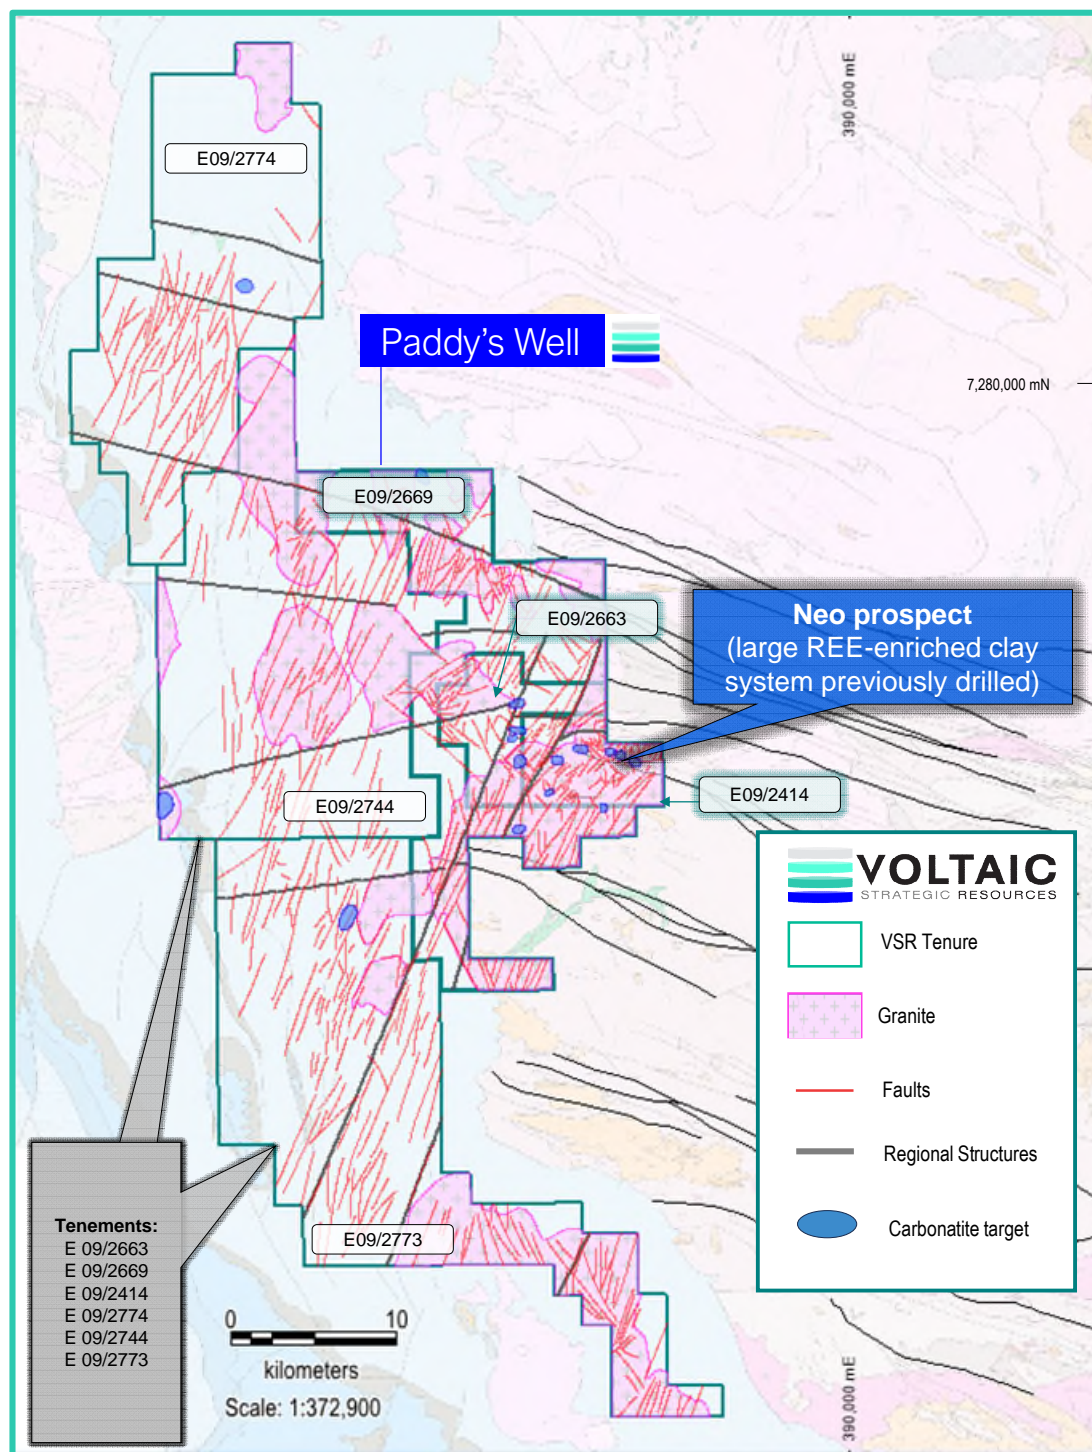

Figure 6. High-priority potential carbonatite intrusions identified from geophysical survey (REE & Niobium)

Kooline Project - Ashburton Gold | Base Metals

The Kooline project comprises a single exploration licence (E 08/3314) covering an area of 303 km² and is situated in the Pilbara Ashburton Shire, 1,000 km north of Perth. Paulsens Gold Mine, owned by Black Cat Syndicate (previously Northern Star), is 40 km north of the project area, and has produced over 900,000 Oz Au since 2005.

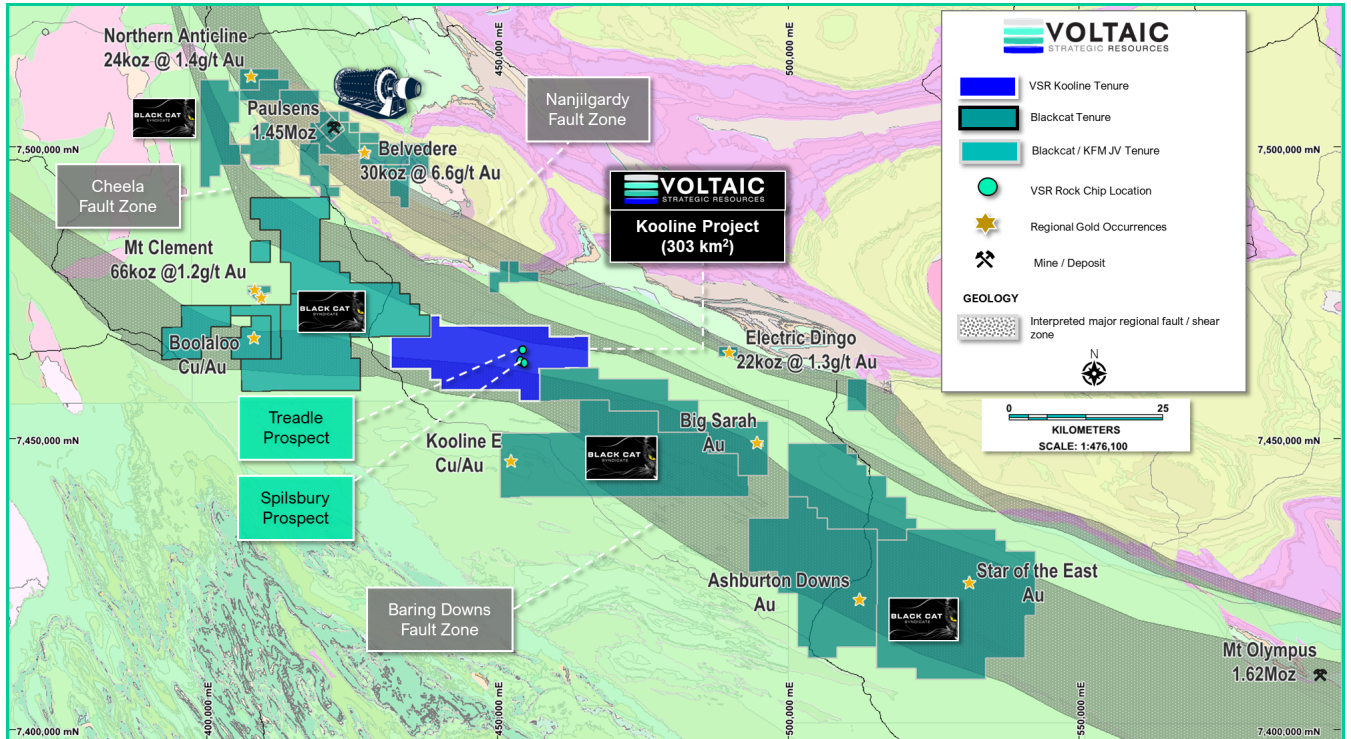

Figure 7. Voltaic's Kooline Gold project location within prolific gold district

Figure 8. Kooline Spilsbury prospect rock chip sample location

The Company had previously announced highgrade, poly-metallic rock chip assay results, which included gold (Au), silver (Ag), lead (Pb), and antimony (Sb), from the Spilsbury and Treadle Prospects at its Kooline Gold Project in Western Australia's prolific Ashburton mineral district. At the Spilsbury Prospect, assays confirm mineralisation over a ~500m strike length, with results including 3.7 g/t gold, 0.32% antimony and 12.7% lead, complemented by historical results of 12.4 g/t gold within poly-metallic mineralisation.

At the Treadle Prospect, mineralised extensions have been identified, highlighted by results of 7.2g/t gold, 130g/t silver, and 25.6% lead. These findings underscore the potential for a substantial gold poly-metallic system across the project area, strategically located adjacent to major operations such as the 1.45 Moz Paulsens Gold Deposit (BlackCat Resources Ltd), further enhancing Kooline's exploration significance.

Geopacific Resources Ltd (Investment)

Woodlark Island (Muyua Island), Papua New Guinea Gold Development Project

In January 2025, the Company made a strategic investment of A\$2.653 million into Geopacific Resources Ltd (ASX: GPR) ("Geopacific" or "GPR") via a shortfall entitlement offer (2 cents per share), securing a 4.2% equity stake. This investment aligns Voltaic's strategy to invest in near term undervalued mineral exploration and development assets with Geopacific being the owner and operator of one of Papua New Guinea's most advanced gold development projects, the Woodlark Gold Project.

Figure 9. Mineral Resources of projects in PNG⁴

⁴ Sourced from Mineral Resources Authority, Papua New Guinea (www.mra.gov.pg)

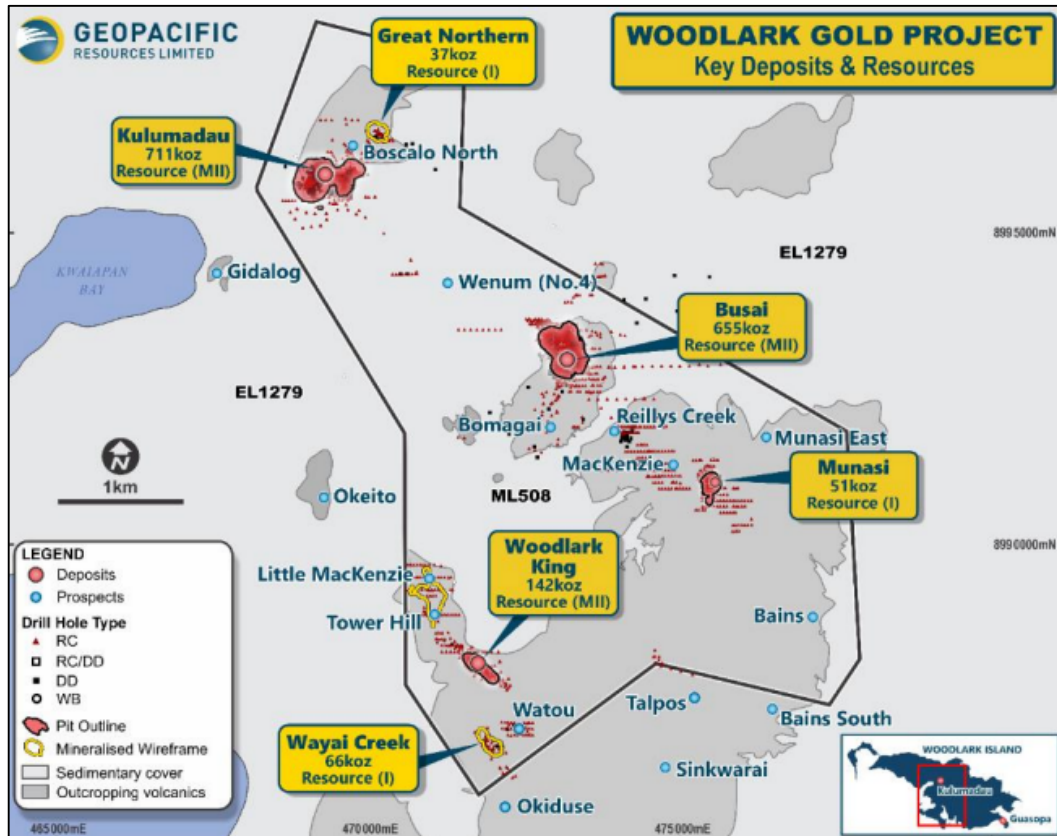

Figure 10. Deposits and Resources that make up the Woodlark Gold Project.

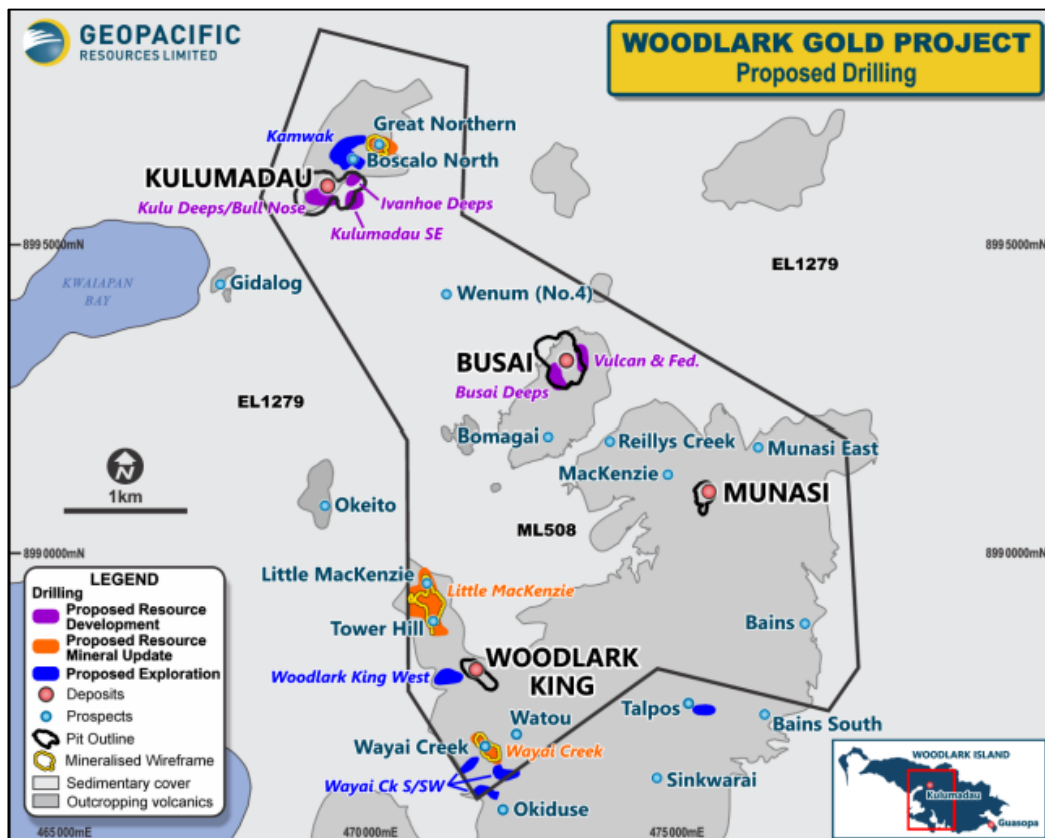

Figure 11. Proposed resource development and exploration targets at Woodlark Gold Project.

The Woodlark Project hosts a robust resource base of 1.67 million ounces of gold, with approximately 88% in Measured and Indicated categories. A 2024 Scoping Study outlines a low-strip open-pit operation producing 1.14 Moz over a 12-year mine life, with strong margins, an NPV₈ of A\$625 million, 18-month payback, and average annualised production of ~95,000 oz at >90% recovery. Importantly, the project's enterprise value at the time did not fully reflect these improved mineral resources and enhanced economics, which presents value upside for the investors.

Since Voltaic's investment in Geopacific:

- GPR has embarked on a major 30,000 m RC and diamond drilling campaign to expand the resource base and support an ongoing Definitive Feasibility Study (DFS).
- High-grade surface auger sampling has delivered strong results at Little MacKenzie and Wayai Creek, including assays up to 63.6 g/t Au⁵, adding further depth to the project's exploration pipeline.
- Additionally, a recent desk-based study highlighted deep porphyry-style copper-gold potential at Woodlark, providing exploration upside beyond the established epithermal system.

Woodlark has the potential to become one of PNG's leading gold operations. Papua New Guinea is home to major gold mines such as

- Lihir - one of the world's largest, with estimated reserves of 45 Moz;
- The Porgera Mine - historically among the top-producing gold mines, producing over 16 Moz over its life. It has recently been reopened under a new special mining lease.

Other prominent mines include Hidden Valley, Kainantu, and Simberi, as well as the long-dormant Panguna deposit, all underlining PNG's significant gold endowment and mining infrastructure.

CORPORATE AND FINANCIAL POSITION

The Group's net profit from operations for the half-year ended 30 June 2025 was \$234,850 (2024 - profit \$478,621).

At 30 June 2025, the group had net assets of \$11,319,971 (31 December 2024: \$10,962,338).

The Directors believe there are sufficient funds to meet the Group's working capital requirements and as at the date of this report the Group believes it can meet all liabilities as and when they fall due.

This report is prepared on the going concern basis which assumes the continuity of normal business activity and the realisation of assets and settlement of liabilities in the normal course of business.

The Directors have reviewed the business outlook and the assets and liabilities of the Group and are of the opinion that the going concern basis of accounting is appropriate and believe the Group will continue to be successful in securing additional funds through equity issues as and when the need to raise funds arises.

⁵ Geopacific Resources Ltd [ASX announcement](#) dated 10 June 2025.

MATTERS SUBSEQUENT TO THE PERIOD END

No matter or circumstance has arisen since 30 June 2025 that has significantly affected, or may significantly affect the entity's operations, the results of those operations, or the entity's state of affairs in future financial years.

DIVIDENDS

No dividends were paid, recommended or declared during the current period.

AUDITOR INDEPENDENCE DECLARATION TO THE DIRECTORS OF VOLTAIC STRATEGIC RESOURCES LTD

Section 307C of the Corporations Act 2001 requires our auditors, Dry Kirkness (Audit) Pty Ltd, to provide the directors of Voltaic Strategic Resources Limited with an Independence Declaration in relation to the review of the interim financial report. This Independence Declaration is set out on page 18 and forms part of the director's report for the half-year ended 30 June 2025.

This report is made out in accordance with a resolution of directors made pursuant to s.306(3) of the Corporations Act 2001.

On behalf of the directors

Daniel Raihani
Chairman

11 September 2025

AUDITOR'S INDEPENDENCE DECLARATION

As lead auditor for the review of Voltaic Strategic Resources Limited for the half year ended 30 June 2025, I declare that, to the best of my knowledge and belief, there have been:

- a) No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the review; and
- b) No contraventions of any applicable code of professional conduct in relation to the review.

This declaration is in respect of Voltaic Strategic Resources Limited and the entities it controlled during the period.

DRY KIRKNESS (AUDIT) PTY LTD

LUCY P GARDNER
Director

Perth

Notes to the Consolidated Financial Statements For the half-year ended 30 June 2025

1. General Information

Voltaic Strategic Resources Limited (**Voltaic** or the **Company**) is a company limited by shares, domiciled and incorporated in Australia. The financial statements cover Voltaic as a Group consisting of Voltaic Strategic Resources Ltd and the entities that it controlled at the end of, or during, the half year.

Voltaic and its subsidiaries focus on exploring mineral assets in Western Australia, targeting precious and critical metals such as lithium, nickel, rare earth elements (REE), and gold. The ultimate goal is to make mineral resource discoveries that drive shareholder growth.

The financial report of Voltaic Strategic Resources Ltd is for the period ending 30 June 2025. This interim financial report does not include all the notes of the type that are normally included in an annual financial report other than significant accounting policy changes that have occurred in the current reporting period.

2. Basis of Preparation

These condensed consolidated interim financial statements for the period ending 30 June 2025 have been prepared in accordance with Accounting Standard *AASB 134 Interim Financial Reporting* and the *Corporations Act 2001*.

These condensed consolidated interim financial statements do not include all the notes of the type normally included in an annual financial report.

The financial report has been prepared on a historical costs basis and has been presented in Australian Dollars (AUD) rounded to the nearest AUD1 unless otherwise stated.

3. Material accounting policy information

The Group has adopted all the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) that are relevant to its operations and effective for an accounting period that begins on or after 1 January 2025.

The Directors have determined that there is no material impact of the new and revised Standards and Interpretations on the Group and, therefore, no material change is necessary to Group accounting policies.

4. Principals of consolidation

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Voltaic as at 30 June 2025 and the results of all subsidiaries for the period then ended. Voltaic and its subsidiaries together are referred to as the Group. Subsidiaries are all those entities (including special purpose entities) over which the Group has power to govern the financial and operating policies, so as to obtain benefits from its activities, generally accompanying a shareholding of more than one-half of the voting rights. The existence and potential effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

The financial statements of the subsidiaries are prepared for the same reporting period as the Parent Entity, using consistent accounting policies. Accounting policies of subsidiaries have been changed when necessary to ensure consistency with the policies adopted by the Group.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. There are deconsolidated from the date that control ceases. Intercompany transactions and balances, income and expenses and profit and losses between Group companies, are eliminated.

5. Segment Information

The Group is deemed to have two operating segments 'Exploration' and 'Investment' based on internal management reports that are reviewed and used by the Group's Executive Committee in assessing performance. Exploration comprises all projects in the exploration, evaluation and feasibility phase of the Group. These include exploration projects at two geographic locations being tenements in Western Australia (Gascoyne and Meekatharra regions). The Investments comprise of shares in listed companies that are involved in mineral exploration and extraction businesses in geographic locations of Papua New Guinea and USA.

6. Going Concern

The financial report has been prepared on a going concern basis, which contemplates the continuity of normal business activity and the realisation of assets and settlement of liabilities in the normal course of business.

The Group generated a net profit of \$234,850 and experienced net cash outflows from operations of \$189,293 for the half-year ended 30 June 2025. The Group had liabilities of \$170,742 and cash on hand of \$2,208,343 as at 30 June 2025. The Group also has investments in other listed entities to the value of \$3,613,064 as at 30 June 2025 which can be sold to realise cash.

The Directors believe there are sufficient funds to meet the Group's working capital requirements and as at the date of this report the Group believes it can meet all liabilities as and when they fall due.

The Directors have reviewed the business outlook and the assets and liabilities of the Group and are of the opinion that the going concern basis of accounting is appropriate as they believe the Group will continue to be successful in securing additional funds through equity issues as and when the need to raise funds arises.

7. Significant events occurring after the reporting date

No matter or circumstance has arisen since 30 June 2025 that has significantly affected, or may significantly affect the entity's operations, the results of those operations, or the entity's state of affairs in future financial years.

8. Income and expenses

	3,613,064	423,550

13. Exploration and Evaluation Assets

Accounting Policy

Exploration and evaluation assets are only recognised if the rights of the area of interest are current and either:

- the expenditures are expected to be recouped through successful development and exploitation of the area of interest, or
- activities in the area of interest have not at the reporting date reached a stage which permits a reasonable assessment of the existence or otherwise of recoverable reserves and active and significant operations in, or in relation to, the area of interest are continuing.

18. Commitments

The Company has certain obligations to perform minimum exploration work on the tenements in which it has an interest. These obligations vary from time to time depending on when ungranted tenements are granted or new tenements are pegged and granted. The aggregate of the prescribed expenditure conditions applicable to the granted tenements for the next twelve months amounts to \$589,600 based on tenements that are currently granted.

1 Year or less	1 – 5 years	Greater than 5 years
\$589,600	-	-

19. Contingent assets and liabilities

The Group had no contingent assets or liabilities as at 30 June 2025.

DIRECTORS' DECLARATION

In accordance with a resolution of the directors of Voltaic Strategic Resources Limited, I state that:
In the opinion of the directors

- (a) The financial statements and notes of Voltaic Strategic Resources Limited are in accordance with the Corporations Act 2001, including;
 - i. Giving a true and fair view of the Group's financial position as at 30 June 2025 and of its performance for the half year ended on that date, and
 - ii. Complying with Australian Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001; and
- (b) Subject to achieving the matters set out in note 6 to the financial report, there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

On behalf of the Board

Daniel Raihani
Chairman
Perth

11 September 2025

**INDEPENDENT AUDITOR'S REVIEW REPORT
TO THE MEMBERS OF VOLTAIC STRATEGIC RESOURCES LIMITED**

Conclusion

We have reviewed the accompanying half year financial report of Voltaic Strategic Resources Limited ("the Company") and its controlled entities ("the Group"), which comprises the consolidated statement of financial position as at 30 June 2025 and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the half year ended on that date, a summary of material accounting policy information and the directors' declaration.

Based on our review, which is not an audit, nothing has come to our attention that causes us to believe that the accompanying half year financial report of the Group is not in accordance with the *Corporations Act 2001* including:

- a) giving a true and fair view of the Group's financial position as at 30 June 2025 and of its financial performance for the half year ended on that date; and
- b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis for Conclusion

We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's responsibilities for the review of the half year financial report* section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's *APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our ethical requirements in accordance with the Code.

Directors' responsibilities for the half year financial report

The directors of the Company are responsible for the preparation and fair presentation of the half year financial report in accordance with the Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities for the half year financial report

Our responsibility is to express a conclusion on the half year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half year financial report has not been prepared, in all material respects, in accordance with the *Corporations Act 2001* including; giving a true and fair view of the Group's financial position as at 30 June 2025 and its financial performance and its cash flows for the half year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*

A review of a half year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
