

ASX Release

5 June 2024

RETRACTION OF VALUATION ESTIMATE OF JV TRANSACTION ON TI-TREE PROJECT

Voltaic Strategic Resources Limited (ASX:VSR) (Voltaic or the Company) refers to the AGM Presentation deck (slides 4 and 15) that it released as an announcement on Friday 31 May 2024.

Included in the announcement was an estimate valuation of the Ti-Tree project (slide 15), which was referenced in slide 4.

The Company retracts slides 15 of the AGM Presentation deck lodged on 31 May 2024 and the reference to the modelled value range on slide 4, as there is no reasonable grounds for this information. Investors should not rely on the retracted information for their investment decisions.

An updated version of the AGM Presentation which does not make reference to the Ti-Tree valuation estimate is attached.

This announcement has been authorised for release by the Board of Directors.

About Voltaic Strategic Resources

Voltaic Strategic Resources Limited explore for the next generation of mines that will produce the metals required for a cleaner, more sustainable future where transport is fully electrified, and renewable energy represents a greater share of the global energy mix.

The company has a strategically located critical metals portfolio led by lithium, rare earths, base metals, and gold across two of the world's most established mining jurisdictions: Western Australia & Nevada, USA.

Voltaic is led by an accomplished corporate and technical team with extensive experience in REEs, lithium and other critical minerals, and a strong skillset in both geology and processing / metallurgy.

 <h3>Gascoyne Region</h3> <p>Western Australia</p> <ul style="list-style-type: none"> • Emerging critical minerals province (REE, Li, Ni-Cu-Co-PGE). • Active neighbours in the region. 	 <h3>Meekatharra Region</h3> <p>Western Australia</p> <ul style="list-style-type: none"> • Established gold district with two vanadium development projects. • Active neighbours in the region. 	 <h3>Stillwater Range</h3> <p>Nevada, USA</p> <ul style="list-style-type: none"> • Ni-Cu-Co project containing formerly producing Co mine. • Global Energy Metals adjacent.

The information contained in this document has been prepared in good faith by Voltaic Strategic Resources Limited. However, no representation or warranty, either express or implied, is made as to the accuracy, completeness, adequacy or reliability of the information contained in this document. This document contains only a synopsis of more detailed information in relation to the matters described herein and accordingly no reliance may be placed for any purpose whatsoever on the sufficiency or completeness of such information as presented herein. This document should not be regarded by the Recipient as a substitute for the exercise of its own judgment and the Recipient should conduct its own due diligence in respect of the contents of this document. To the maximum extent permitted by law Voltaic Strategic Resources Limited, its directors, officers, employees, advisers, and agents disclaim any or all liability for any loss or damage which may be suffered by any person as a result of the use of, or reliance upon, anything contained within or omitted from this document.

This document has been prepared solely for informational purposes. This document does not constitute a prospectus and is not to be construed as a solicitation or an offer to buy or sell any securities, or related financial instruments, in any jurisdiction. The Recipient should not construe the contents of this document as legal, tax, accounting or investment advice or a recommendation. The Recipient should consult its own legal counsel, tax and financial advisors concerning any matter described herein. This document does not purport to be all-inclusive or to contain all of the information that the Recipient may require. No investment, divestment or other financial decisions or actions should be based solely on the information in this document. The distribution of this document may be restricted by law in certain jurisdictions. The Recipient and any other persons who come into possession of the document must inform themselves about, and observe, any such restrictions.

CAUTIONARY STATEMENT REGARDING VALUES & FORWARD-LOOKING INFORMATION

The figures, valuations, forecasts, estimates, opinions and projections contained herein involve elements of subjective judgment and analysis and assumption. Voltaic Strategic Resources Limited does not accept any liability in relation to any such matters, or to inform the Recipient of any matter arising or coming to the company's notice after the date of this document which may affect any matter referred to herein. Any opinions expressed in this material are subject to change without notice, including as a result of using different assumptions and criteria.

This document may contain forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "believe", "plan", "expect", and "intend" and statements than an event or result "may", "will", "should", "could", or "might" occur or be achieved and other similar expressions. Forward-looking information is subject to business, legal and economic risks and uncertainties and other factors that could cause actual results to differ materially from those contained in forward-looking statements. Such factors include, among other things, risks relating to property interests, the global economic climate, commodity prices, sovereign and legal risks, and environmental risks. Forward-looking statements are based upon estimates and opinions at the date the statements are made. Voltaic Strategic Resources Limited undertakes no obligation to update these forward-looking statements for events or circumstances that occur subsequent to such dates or to update or keep current any of the information contained herein. The Recipient should not place undue reliance upon forward-looking statements. Any estimates or projections as to events that may occur in the future (including projections of revenue, expense, net income and performance) are based upon the best judgment of Voltaic Strategic Resources Limited from information available as of the date of this document. There is no guarantee that any of these estimates or projections will be achieved. Actual results will vary from the projections and such variations may be material. Nothing contained herein is, or shall be relied upon as, a promise or representation as to the past or future. Voltaic Strategic Resources Limited, its affiliates, directors, employees and/or agents expressly disclaim any and all liability relating or resulting from the use of all or any part of this document or any of the information contained herein.

This material must not be copied, reproduced, distributed or passed to others at any time, in whole or in part, without the prior written consent of Voltaic Strategic Resources Limited.

COMPETENT PERSON'S STATEMENT

The information in this announcement that relates to Exploration Results is based on and fairly represents information compiled by Mr Claudio Sheriff-Zegers. Mr Sheriff-Zegers is employed as an Exploration Manager for Voltaic Strategic Resources Ltd and is a member of the Australasian Institute of Mining and Metallurgy. He has sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. He consents to the inclusion in this announcement of the matters based on information in the form and context in which they appear.

Recent successful Lithium Transaction between VSR & Delta Lithium Ltd

A\$12 million Farm-in and JV Agreement with Delta Lithium (ASX:DLI) on VSR's Ti Tree project

- DLI pay **A\$1.25 million** cash consideration upon commencement (March 2024).
- DLI earn a **51%** by spending **A\$3.0 million** within 24-months, with minimum spend of **A\$1.0 million** (“**Stage 1**”).
- May earn an additional 29% interest by **further expenditure of A\$6,250,000** or delivery of a **Mineral Resource Estimate (MRE) > 10 Mt @ 0.8% Li₂O** within 3-years (“**Stage 2**”).
- Voltaic to receive a further **A\$0.5 million payment** in cash/script from Delta upon commencement of Stage 2.
- Voltaic to receive a further **A\$1.0 million payment** in cash/script from Delta upon completion of Stage 2.

Significant valuation upside on Resource discovery

Significant potential for project valuation rerate if significant lithium resource delineated

Strategic Goal Setting

Vision: Become a leading metals exploration & development company

Mission: Make a significant discovery or acquire an advanced stage asset with a clear pathway towards development within near future

Strategic Objectives:

1. Acquire a more advanced stage project (post discovery, pathway to production)
2. Conserve cash and focus only on **Meekatharra & Paddys Well from current portfolio of projects**
3. Divest non-core assets

Strategic Goal Setting

Objective: Advanced-Stage Project Acquisition

- The Company is seeking to complement its existing portfolio of early-stage exploration assets with a **high calibre more advanced stage project**.
- We have spent the last several months undertaking a strategic search and have conducted due diligence on multiple (> 25) opportunities.
- Search ongoing for the right asset.
- Existing exploration projects (Meekatharra & Paddys Well) will be advanced in parallel

WHY?

- **Resources and team in place to quickly advance such a project**
 - Significant technical experience (geology & metallurgy / processing) including several international projects
- Market is seeking & rewarding advanced projects
- Strong cash position (A\$7M)
- Very clean corporate structure

VEHICLE

TEAM

SKILLS

CASH

Project Portfolio - Australia

Primary Focus Project 1:

Meekatharra Project

- Located in the prolific Gold & Critical Metals Murchison region in Western Australia.
- Centrally located in a highly productive (35M oz +) and prospective Archean gold province with 4 camps hosting > 2Moz thus far.
- Largely underexplored, despite its proximity to numerous historical and active open pits and underground mines, and geologically prospective structures.
- Several reconnaissance rock chips have confirmed primary gold & copper mineralization

Primary Focus 2:

Paddy's Well Project

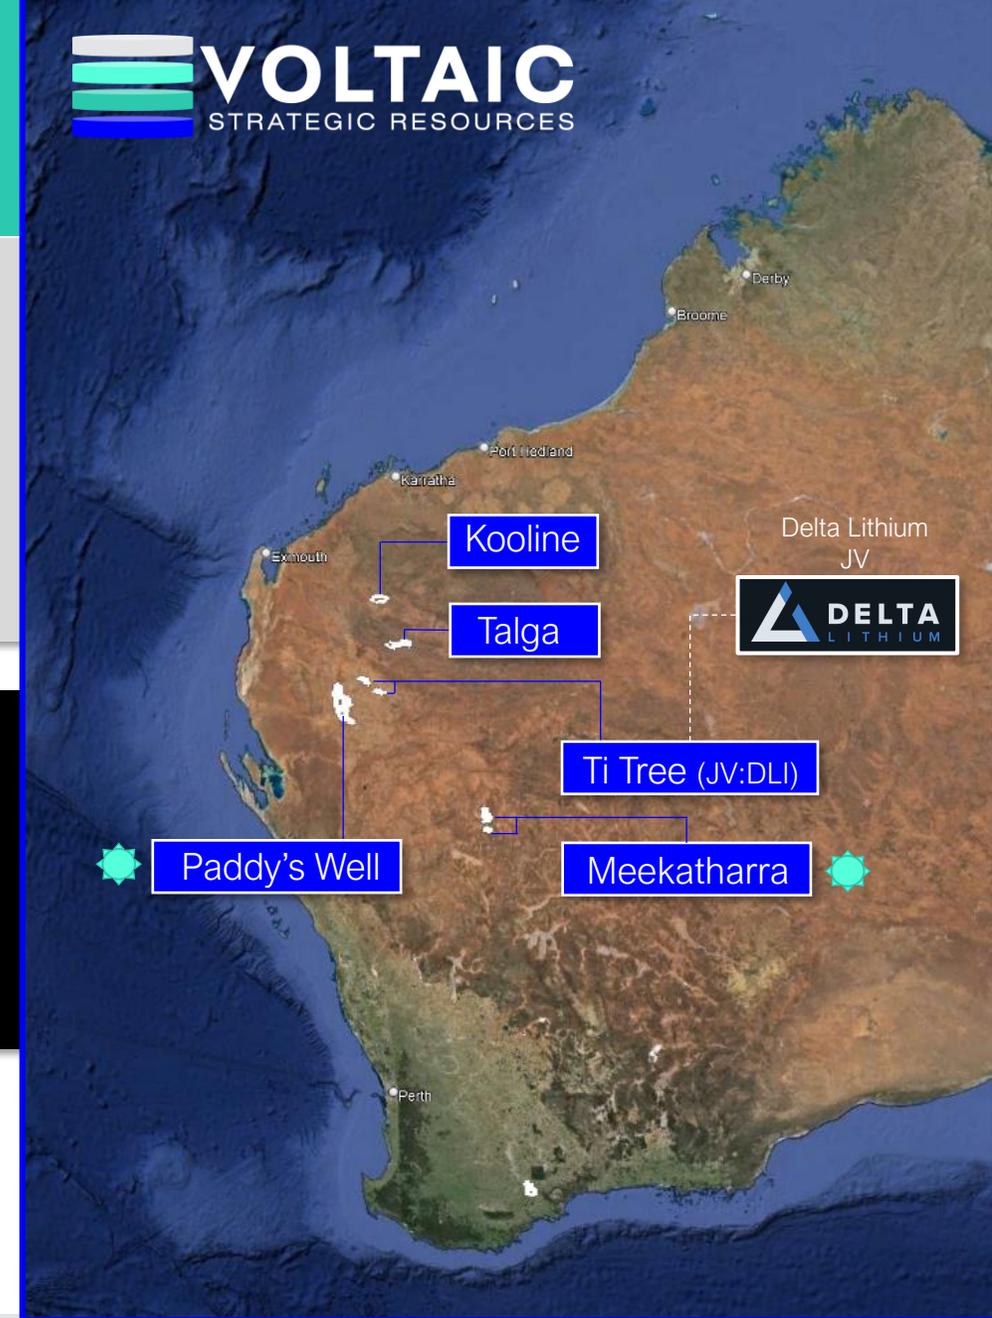

- Large landholding (1,300km²) in highly active REE & uranium exploration 'hotspot'.
- Both primary carbonatite and clay-hosted REE potential, with additional Lithium prospectivity.
- VSR has identified widespread anomalous REEs from drilling (~80m intervals from surface). Metallurgical testing showing REEs are extractable via leaching
- Historical uranium drilling by reputable explorers like Cameco identified calcrete-hosted mineralisation

Joint Venture with ASX:DLI:

Ti Tree Lithium Project

Other assets (non-core):

Kooline, Talga, Nevada (USA)

Meekatharra project

Large tenure within a prolific gold precinct in Western Australia which has produced >35Moz of Au.

Established gold district

- Westgold's Bluebird Project (1.8Mtpa production) and Tuckabianna Project within trucking distance.
- Paddy's Flat, Bluebird, South Emu, Triton, Big Bell, and Comet mines have produced >270Koz Au per year.
- Located in the prolific Gold & Critical Metals Murchison region in Western Australia.
- Largely underexplored, despite its proximity to numerous historical and active open pits and underground mines, and prospective structures.
- Several reconnaissance rock chips have confirmed primary gold & copper mineralisation*

Emerging vanadium-titanium district

- Australian Vanadium (ASX:AVL) Project (Resource 239Mt @ 0.73% V₂O₅).
- Technology Metals' Gabanintha Project (now owned by AVL) (Resource 110Mt @ 0.84% V₂O₅).

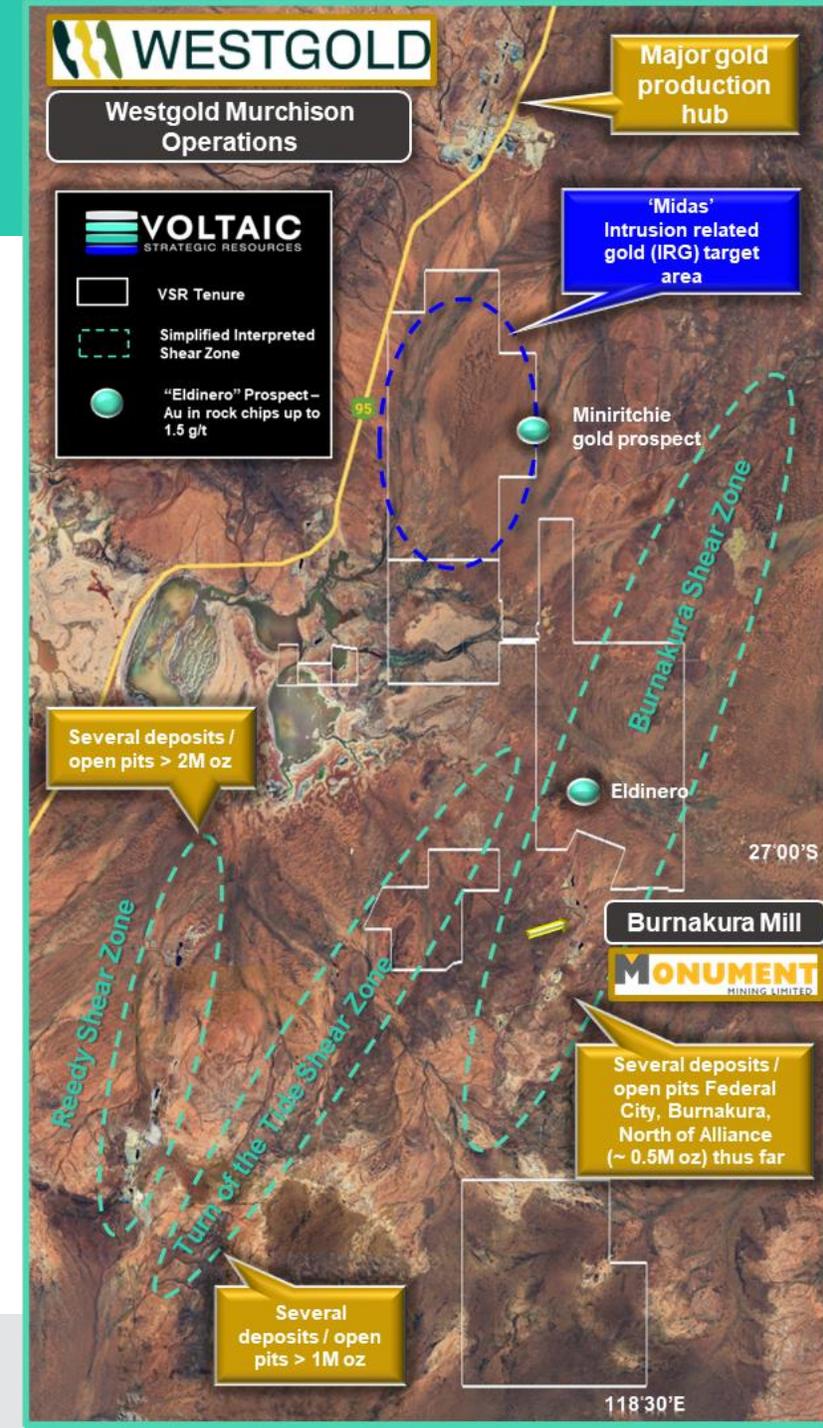

*See ASX:VSR announcement dated 31/05/2024

Meekatharra project

- **Strategic Geological Setting:** Significant portion of the Burnakura Shear Zone (BSZ) within project ⇒ highly prospective for gold.
- **Proven Gold Potential:** Adjacent to substantial gold resources totalling 0.5M oz, incl. remnant 381k oz at Federal City, Burnakura, and North of Alliance deposits.
- **High-Grade Mineralisation:** Extensive untapped potential in interconnected structures within the BSZ.
- **Untapped Exploration Targets:** 7 km segment of the BSZ within E51/1909 remains largely unexplored, highly prospective for gold mineralisation.
- **Initial Sampling Highlights:** Preliminary sampling at 'Eldinero prospect' shows primary gold mineralization, with several rock chip samples returning >1.2 g/t Au.
- **Intrusion Related Gold (IRG) Model:** Significant I-type magnetic ovoid formation identified, suggesting potential for an IRG system.
- **Untapped Potential:** Large non-magnetic zones in the Norie Pluton indicate possible sites for hydrothermal alteration and gold mineralisation.

Meekatharra project

Promising reconnaissance rockchips from Eldinero prospect

- Reconnaissance field work at Eldinero has discovered visually promising outcrops from a brecciated quartz-sulphide vein system up to 10m wide and 200m strike.
- The veins are prospective for copper, gold & silver (assays pending).
- Several historic & active quartz-vein hosted shear-related gold deposits along strike, including Westgold's Paddy's Flat & Great Fingal
- BRK0004 & BRK0006 rock chip samples shown*
- Mineralisation appears linked to Burnakura Shear Zone within a wide package of dolerites **over 10 km of strike**
- **Next steps:** extend and delineate mineralisation via further surface geochemical surveys

Paddy's Well Project

Multi-commodity potential across extensive 1,300km² tenement package

Uranium identified by Cameco, VSR & others

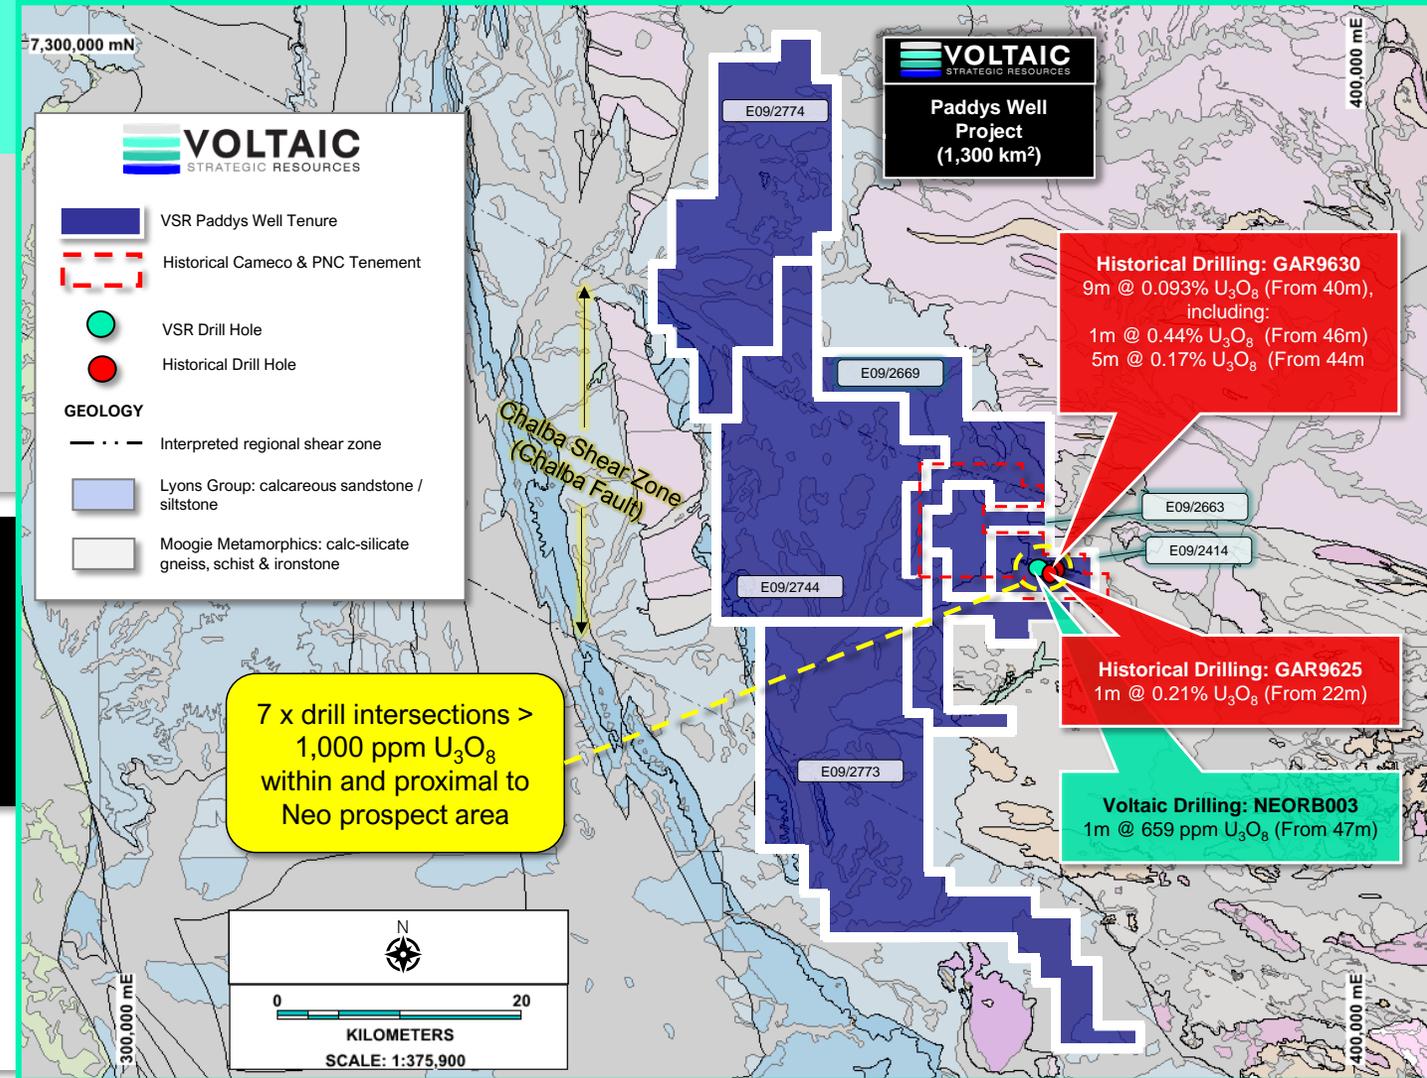

- Previous exploration undertaken by Cameco and others returned significant U₃O₈ mineralisation from drilling.
- Primary uranium mineralisation was demonstrated to be geochemically analogous to Jabiluka.

REEs already identified by VSR

- Both primary carbonatite and clay-hosted REE potential.
- Widespread REEs within clay identified from maiden drilling at 'Neo' & testing proved REEs are extractable via leaching.

Untapped Lithium potential

- Several newly identified granites and pegmatites
- Proximal to historical Tantalum mine / process plant (Arthur River)

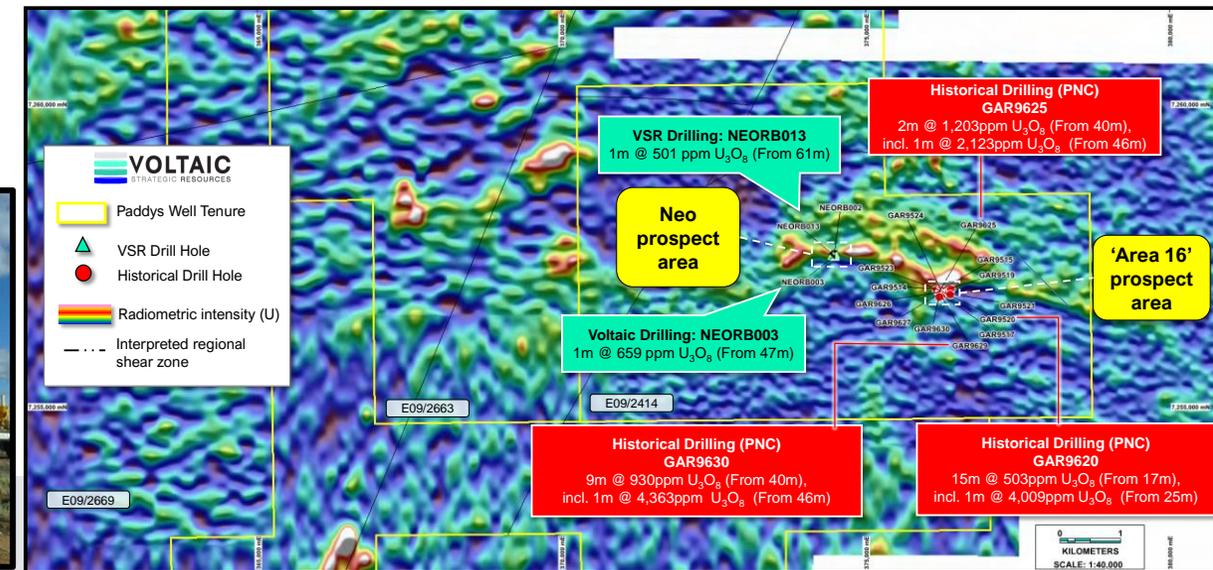

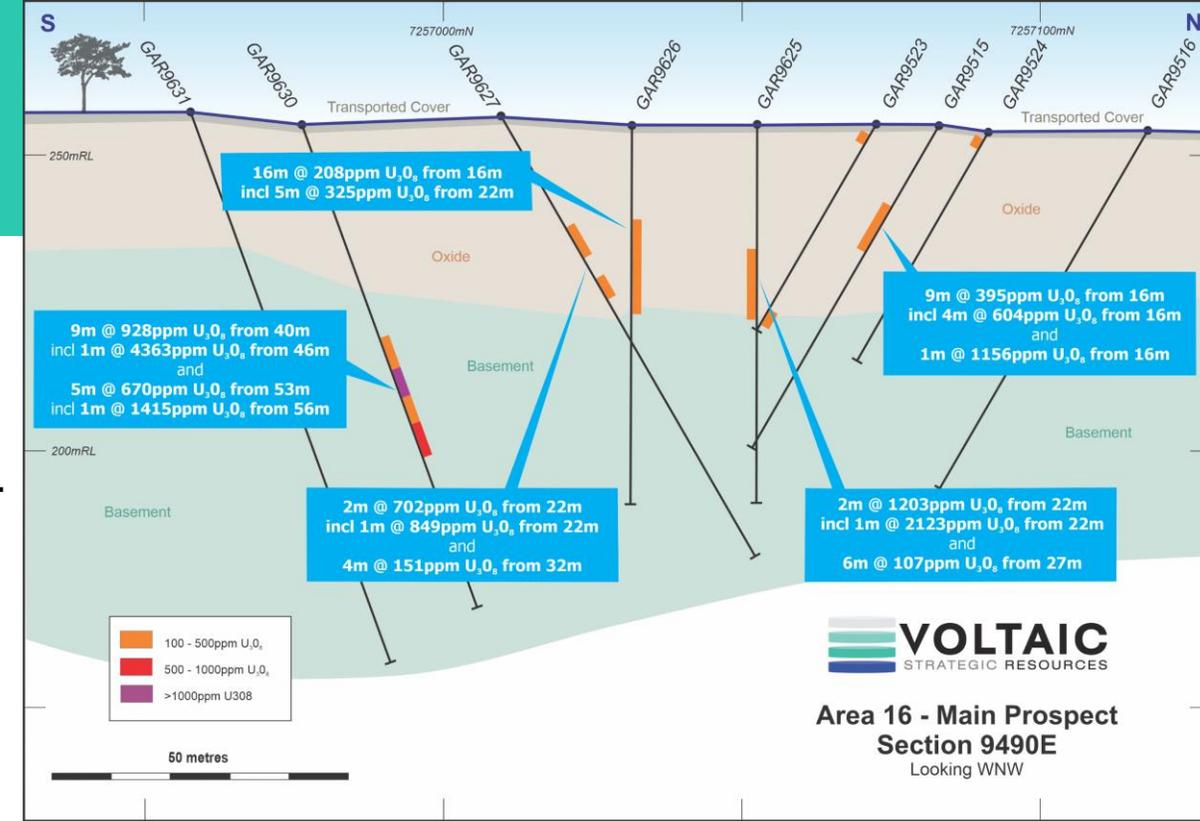

Paddy's Well Project

Historical uranium drilling at the 'Area 16' prospect

- Historical drilling at 'Area 16', and a recent campaign by VSR targeting shallow REE mineralisation at 'Neo' to the west, returned several mineralised uranium intercepts
- Each occurrence associated with distinctive radiometric anomalies.
- Several additional radiometric peaks are also apparent from this data and warrant follow-up.

Next Steps at Paddys Well:

- Follow-up on-ground systematic reconnaissance at identified radiometric anomalies focusing both on REE and uranium.
- Planning for follow-up shallow drilling at Neo is in progress to delineate U mineralisation along strike of the identified zones
